LF565 Applications Previously Using LF402

Engineering Bulletin F04-1 issued on February 24, 2004, defined a problem with some Mitsubishi applications. Hastings Filters withdrew the LF402 as a replacement for the applications that called for the Mitsubishi MZ690116 lube filter, due to pressure conditions that exceeded the LF402 design limits.

In February 2005, Hastings introduced the LF565 lube filter designed to meet the structural requirements of the Mitsubishi MZ690116/Hyundai 26300-35501. The primary group of applications is listed below. ***The LF402 continues to be used on many other applications that were not involved with the issue stated above.***
