### Application Notice for the FF1160 on Cummins® 5.9 Liter Turbo Diesel Engines

Cummins has upgraded the performance specifications for the fuel filter on Dodge Ram applications using the 5.9 liter turbo diesel engine. These specifications are applicable for July 2002 through 2006 model year engines and are intended to improve the durability of the fuel injectors.

Engines produced prior to July 2002 are not affected by this new specification. The FF1160 will continue to be applied to 2000 through June 2002 models. The FF1160 meets the performance requirements established by Cummins for these earlier engines.

**Please see the table below for the current Hastings fuel filters for these applications.**

<b>2000 - June 2002 Cummins Turbo Diesel Applications</b>	<b>July 2002 - 2006 Cummins Turbo Diesel Applications</b>
<b>FF1160</b>	Fuel Filter in development to replace Fleetguard FS19800

A new Hastings product is currently being developed to fulfill the requirements on the newer engines as a replacement for the new Fleetguard product (FS19800). Please watch upcoming New Product Announcements for availability of the new Hastings product.
